

FOR IMMEDIATE RELEASE

Mariner and The Remi Group Develop Analytics Dashboard to Improve Risk Management and Decision Making

Decade-Long Relationship Proves Valuable to Equipment Maintenance Leader

February 23, 2010 – Charlotte, NC – Mariner, an industry-leading business intelligence, performance management and analytics solutions provider, has been selected by The Remi Group, a leader in Equipment Maintenance Management Programs, to develop an analytics solution that includes data management, data visualization, analytics and dashboards. As Mariner's first client back in 1998, The Remi Group has great insight into Mariner's deep knowledge, expertise and staying power.

"Our close, long-standing relationship with Mariner is one of the reasons we chose them for this project. Mariner was our partner when we developed our initial systems. Now that we're ready to improve our analytics capabilities, we are calling on Mariner once again to help us utilize our data assets to better manage our company," comments Dan Schuster, The Remi Group's Founder & CEO.

"Our history with The Remi Group enables us to hit the ground running and quickly produce results," adds Joseph S. Guy, COO for Mariner. "This project is exciting because we will be helping The Remi Group put analytical tools in the hands of everyone in the organization."

Using Tableau and Microsoft SQL Server, The Remi Group associates will be able to quickly and easily visualize policy information; drill down into data for root cause analyses; and monitor and evaluate changes in policies. The entire solution, including software and implementation services, is less than the cost of adding a single additional IT resource.

About The Remi Group

The Remi Group [www.theremigroup.com] provides comprehensive Equipment Maintenance Management Programs for Hospitals & Healthcare Providers, Financial Institutions, Government Agencies, Colleges and Universities, Grocery Stores and Commercial Operations by providing quality service, technical resources, management systems and financially secure solutions.
